

# Ignite our Hearts, Harness our Powers, then, We can Coil the World again.

Hello my diverse shiny Diamonds and hurtling Zebras.

First of all, I would like to show my deepest gratitude continuously to medical and healthcare professionals, people who works for children, and to our comrades.

Although the first phase of this crisis from corona virus is behind, we never expect that it wouldn't be like this for such a long time.

As I've been expressing from the beginning, our strong relationship with all stakeholders never change.

However, I need to share with you that we need to restructure DEJP's home electronic business. It is very unfortunate but since it's low profitability and enormous inventory costs. It's unbearable that this business was led by weak leader, but nothing, nothing to worry about, from now on, I declare this business is going on and growing up, led by myself.

I promise each of you that we will survive through this disaster with new structure of home electronics that is supported by Automotive and Energy Solution business.

This time I'd like to let you know one special word.

It is "solidarity" which means, unity of action, especially among individuals with common interest.

I think this word shows how our group stands, individuals are Diamonds and Zebras, and we have a common goal to connect the automotive and homes with "monozukuri / manufacturing".

Let us all give our hands to each other and let us jointly achieve and share our goals.

As we begin to reopen, we must use this opportunity to build back better then, new, bright, and hopeful days are at our hands.

Ignite our Hearts, Harness our Powers, then,  
We can Coil the World again.

My purpose to visit you was to meet our customer's VIPs, however this time, I'm coming for you.  
Thank you. See you soon. Stay tuned.

Thank you.

謝謝

ขอบคุณครับ

Terima kasih

Köszönöm

धन्यवाद

감사합니다

Tôi xin chân thành cảm ơn
